

Clarity Care

# Full Body Imaging

See the **full picture**  
of your health.

Our comprehensive full-body MRI scans—from head to thighs—help detect potential health issues early when treatment is most effective. Clarity Care's subspecialty-trained radiologists provide expert analysis, catching details that less-trained radiologists might miss. Your doctor, who knows your health best, will receive your imaging and report to offer personalized guidance on your results and next steps.

## Scan & Pricing

Options:

**\$1900**

**Full Body MRI Scan**

**\$2250**

**Comprehensive Body Scan Package**

Includes Full Body MRI Scan plus Body Composition Scan, Low-dose CT Lung Cancer Screening & Calcium Scoring

# Enhance your health with optional add-ons.

Add-on screenings offer deeper insights into body composition, lung health, and heart disease risk. Enhance your Full Body MRI with these optional screenings for just **an additional \$350**—a comprehensive package designed to give you greater control over your health.

## Body Composition Scan

Understand your body's fat, muscle, and bone health in greater detail.

## Low-Dose CT Lung Cancer Screening

This non-invasive scan can detect early signs of lung cancer, even in those who may have no symptoms.

## Calcium Scoring Test

Assess your heart health by measuring the amount of calcium in your coronary arteries, helping you gauge your risk for heart disease.
